PROFESSIONAL SUMMARY

Informatics Engineering student with a strong background in full-stack web development. Experienced in building scalable and responsive applications using Laravel, React.js, Next.js, and Express.js. Passionate about developing efficient web solutions and eager to contribute to innovative teams in a full-time role.

EXPERIENCE

Bisnis Indonesia Group, Jakarta *(Feb 2024 – Jun 2024)*
IT Programmer Intern

- Internal Employee Website (Laravel 5)
  - Fixed various bugs (unclickable buttons, duplicate data, missing pages), improving system efficiency.
  - Added new database features, including automatic inventory numbering based on company, category, and year inputs.
  - Developed an automated logging system for item borrowing and returning based on user activity.
  - Integrated AJAX to enhance data transmission from controllers to views.
- Employee Portal Revamp (Next.js 14 & Express.js)
  - Led the complete redesign of the internal employee portal using Next.js 14 and Express.js.
  - Engineered a secure login system with Fetch API and advanced password hashing.
  - Developed key sections, including Profile and Company Regulations pages.
  - Built a reservation management system for meeting room bookings, improving operational efficiency.

EDUCATION
